Looking forward to explore and experience more. A detail oriented and multitasking professional with coding techniques pursuing Bachelor's in Computer Science Technology. Comprehensive knowledge of primary development languages for instance C; C++ and diving into DSA. Able to understand and implement modern operating systems and great experience of their troubleshooting. Excellent in presenting and make people understand. Excellent time management skills to meet tight deadlines and prioritize tasks effectively.

Experience

Vezber Technology Pvt. Ltd. - Software Engineering Intern

Remote, India

09/2023 - 12/2023

- Implemented new features into existing software systems using HTML ; CSS ; JavaScript and React.
- Utilised version control systems like Git and GitHub to manage source code changes during development cycle.
- Collaborated with other developers on coding projects in an Agile environment.

Internshala – Data Entry

Remote, India

05/2021 – 07/2021

- Entered and verified data into the company's database with 99% accuracy.
- Assisted in organizing and maintaining data records to ensure easy accessibility for team members.
- Collaborated with the team to complete data-related projects on time.

Activities And Honors

- I worked as a Veteran Coordinator in our college fest, and under my guidance, our team won the Discipline and Sincere Team Award.
- Actively participated in numerous school and college events and competitions, showcasing talent in singing, engaging in debates, and serving as an anchor, enhancing communication and presentation skills.
- Elected as the Class Representative in my batch following a successful campaign and college election.

Projects

- [MEALSHARE](#) – “Transforming Surplus into Sustenance”

Developed an innovative application aimed at reducing food waste by connecting surplus food from restaurants and households with individuals in need. [Git Link](#)
Technologies used like CSS, Bootstrap, HTML , JavaScript.

- [Railway Reservation Website](#)

Created a user-friendly platform for booking and managing train tickets, including user authentication, schedule search, real-time booking, and an admin panel for management. [Technologies](#) used like CSS, Bootstrap, HTML , JavaScript . [Git Link](#)
